

Nutrients – Introductory Information

Age Cohorts	1973-78 Birth Cohort (“Younger”) 1946-51 Birth Cohort (“Mid-age”)
Survey	Three Both cohorts have the full DQES / FFQ Five 1973-78 birth cohort has the full DQES / FFQ 1946-51 birth cohort has only some nutrition questions Six 1973-78 birth cohort does not have nutrition questions 1946-51 birth cohort has only some nutrition questions Seven 1973-78 birth cohort does not have nutrition questions 1946-51 birth cohort has the full DQES / FFQ
Prepared by	Anne Russell, Jean Ball, Anna Graves and David Fitzgerald

This document was updated in May 2015.

Where the full DQES / FFQ is has been used in the surveys the data is kept in a separate FFQ data set. The nutrition variables are not included in the main analysis data set. For those surveys which have only some nutrition questions the data items are included in the main analysis data set.

There are special considerations when using the nutrition data.
