

Data book

For the ninth survey of the 1946-51 cohort
Surveyed 2019/2020, when aged between 68-73
years

November 2020

Data book for the ninth survey of the 1946-1951 cohort (aged 68-73 years)

This work is copyright. Permission to use or reproduce material in this book for the purpose of free distribution is not required, provided that proper acknowledgement of the source is given. For other uses, apart from any permitted use under the Copyright Act 1968, no part may be reproduced by any process without written permission from the Director, Australian Longitudinal Study on Women's Health, University of Queensland.

Acknowledgements

This study is funded by a grant from the Australian Government Department of Health. This document was prepared by David Fitzgerald and Paul McElwee, with help from the data management group of the Australian Longitudinal Study on Women's Health (ALSWH) at the Universities of Queensland and Newcastle. The research team would like to thank all participants who contributed to the project.

Notes

During 2019 and 2020, 7956 valid surveys were returned from members of the ALSWH 1946-51 birth cohort. There were 4490 paper questionnaires returned and 3466 responded online.

This data book is ordered in the order of the questions on the paper questionnaire. The questionnaire number is given where appropriate. Some derived variables are given in place of the questionnaire item or immediately after it. The derived variables do not have any questionnaire numbering.

The frequencies in this data book were weighted according to the area classification to account for the deliberate over-sampling of women from rural and remote areas. The missing amounts were not weighted. Both the missing and not missing counts were not weighted for the non-categorical responses.

For information on the derived variables refer to the ALSWH website (www.alswh.org.au). The ALSWH website has general information about the project; the investigators and staff; publications and presentations; information for participants; surveys; and information for potential data users.
