Australian Longitudinal Study
on Women's Health

Data book

For the tenth survey of the 1946-51 cohort

Surveyed 2022/2023, when aged between 71-77
years

November 2023

Data book for the tenth survey of the 1946-51 cohort (aged 71-77 years)

This work is copyright. Permission to use or reproduce material in this book for the purpose of free distribution is not required, provided that proper acknowledgement of the source is given. For other uses, apart from any permitted use under the Copyright Act 1968, no part may be reproduced by any process without written permission from the Director, Australian Longitudinal Study on Women's Health, The University of Queensland or The University of Newcastle.

Acknowledgements

The research on which this data book is based was conducted as part of the Australian Longitudinal Study on Women's Health by the University of Queensland and the University of Newcastle. We are grateful to the Australian Government Department of Health and Aged Care for funding and to the women who provided the survey data.

This document was prepared by Paul McElwee, with help from the Data Management Committee of the Australian Longitudinal Study on Women's Health (ALSWH) at the Universities of Queensland and Newcastle.

Notes

From June 2022 to August 2023, 7,159 valid surveys were returned from members of the ALSWH 1946-51 birth cohort. There were 3,129 paper questionnaires returned, and 4030 online completions.

This data book is ordered in the order of the questions on the paper questionnaire. The questionnaire number is given where appropriate. Some derived variables are given in place of the questionnaire item or immediately after it. The derived variables do not have any questionnaire numbering.

The frequencies in this data book were weighted according to the area classification to account for the deliberate over-sampling of women from rural and remote areas at baseline. The missing amounts were not weighted. Both the missing and not missing counts were not weighted for the non-categorical responses.

For information on the derived variables refer to the ALSWH website (<http://www.alwsh.org.au/>). The ALSWH website has general information about the project; the investigators and staff; publications and presentations; information for participants; surveys; and information for potential data users.
